IMPORTANT INFORMATION

MODIFICATION NOTICE

Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by this Users Guide, could void your authority to operate this product.

GENERAL PRECAUTIONS

Before you use this scanner, please read and observe the following:

* **Earphone Warning**

You can use an optional 32Ω stereo headset or earphone with your scanner. Use of an incorrect earphone or headset might be potentially hazardous to your hearing. The output of the phone jack is monaural, but you will hear it in both headphones of a stereo headset.

Set the volume to a comfortable audio level coming from the speaker before plugging in the earphone or headset. Otherwise, you might experience some discomfort or possible hearing damage if the volume suddenly becomes too loud because of the volume control or squelch control setting. This might be particularly true of the type of earphone that is placed in the ear canal.

* **Liquid Exposure Warning**

Uniden does not represent this unit to be waterproof. To reduce the risk of fire or electrical shock, do not expose this unit to rain or moisture!

* **Power Disconnection Caution**

*IMPORTANT: Always turn the scanner off before disconnecting external power. Some settings are saved only as the scanner is powering down.*
INTRODUCTION

The Uniden UBCD3600XLT is digital TrunkTracker V communications receivers that require no user programming. Simply turn it on, enter your location, and you will immediately begin hearing communications in your area. This functionality is made possible by combining the rich radio system database from RadioReference.com with Uniden’s patented radio system selection methods to correctly identify and monitor only nearby systems.

NOTE

All Radio Reference database options are for use in North America ONLY.

CREATE FAVORITES LISTS

As you find transmissions you like and would like to monitor again, you can save them to a Favorites List. When you opt to listen to a Favorites List, your scanner will monitor only the transmissions from that list.

You can assign a Quick Key to a Favorites List (FLQK) that allows you to quickly turn a Favorites List on or off by simply entering the quick key on the keypad while scanning.

AVOID TRANSMISSIONS

You can also select transmissions for your scanner to Avoid (ignore).

REPLAY TRANSMISSIONS

Your scanner Replay feature acts as an instant replay of the transmissions you’ve just heard. You can set how long a period Replay records for instant playback. This period can range from 30 seconds to 240 seconds (4 minutes). While you can replay that recording immediately and continue replaying it, you cannot save it for future listening.

RECORD TRANSMISSIONS

With your scanner, you can record transmissions. When you begin recording, your scanner adds the Replay recording buffer to the recording. These recording sessions are saved and can be replayed on demand. Rename and delete sessions through the Review Recordings submenu.

MAIN FEATURES

Favorites Scan – Allows you to organize your Systems into Favorites Lists. The scanner will scan multiple Favorites Lists and Full Database at the same time.

4 GB microSD card (provided - 1 GB up to 32 GB supported) – For storing Favorites Lists, Profiles, all your settings, Discovery sessions, and recording sessions.

Location Based Scanning – Connect to a GPS receiver (not included) for precise system selection and continuing reselection when you travel. The scanner can automatically Avoid and Unavoid Systems and Departments based on your current location as provided by an external GPS unit.

Range Control – Lets you set how far out from your current location the scanner will search for channels in Favorites Lists. Location precision for departments and sites that allows you to define a location and range using rectangles instead just of a single circle.
**Trunk Tracker V Operation** – Scans APCO 25 Phase 1 and Phase 2, DMR, Motorola, EDACS, EDACS ProVoice, and LTR trunked systems, as well as conventional analog and P25 digital channels.

**Multi-Site Trunking** – Lets you program the scanner to share trunked system IDs across multiple sites without duplicating IDs.

**Control Channel Only Scanning** – With Motorola trunking frequencies, you do not have to program voice channel frequencies.

**Instant Replay** – Plays back up to 240 seconds (4 minutes) of the most recent transmissions.

**Audio Recording** – Capture transmissions for later playback.

**Custom Alerts** – You can program your scanner to alert when you receive, a Channel or Unit ID, a Close Call hit, an ID is transmitted with an Emergency Alert, or a Tone-out hit. For each alert in the scanner, you can select from 9 different tone patterns, 15 volume settings, 7 colors, and 2 flash patterns.

**Multicolor LED Alert** – The alert LED with 7 colors, Blue, Red, Magenta, Green, Cyan, Yellow, or White, can be used with your Custom Alerts.

**Trunking Discovery** – Monitors system traffic on a trunked radio system to find unknown IDs and automatically records audio from and logs new channels for later review and identification.

**Conventional Discovery** – Searches a range of frequencies to find unknown frequencies and automatically records audio from and logs new channels for later review and identification.

**Scan by Service Types** – Scan your channels by Service Type i.e. Fire, Police, Railroad, etc.

**Search Speed** – 80 step/sec. (typical) in Search mode (max) except for 5 kHz steps. 250 step/sec. (typical) in Search mode (max) – (Turbo Search) for 5 kHz steps.

**Multi-Level Display and Keypad light** – Makes the display and keypad easy to see in dim light with three light levels.

**Temporary or Permanent Avoid** – For Systems/Sites/Departments/Channels.

**System/Channel Number Tagging** – Number tags allow you to quickly navigate to a specific Favorites List, System, or Channel.

**Start-up Configuration** – You can program each of your Favorites Lists with a Startup Key (0-9) so that when you power up the scanner and press the key number, just those Favorites Lists assigned to the key will be enabled for scan.

**Close Call® RF Capture Technology** – Lets you set the scanner so it detects and provides information about nearby radio transmissions. Close Call Do-not-Disturb checks for Close Call activity in between channel reception so active channels are not interrupted.

**Broadcast Screen** – Allows the scanner to ignore hits in search and Close Call modes. You can also program up to 10 custom frequency ranges that the scanner will ignore.

**Fire Tone-Out Standby/Tone Search** – Lets you set the scanner to alert you if a two-tone sequential page is transmitted. You can set up to 32 Tone-Outs. The scanner will also search and display unknown tones.

**PC Programming** – Use the Sentinel software to manage your scanners Profiles, Favorites Lists, and firmware updates.

**Analog and Digital AGC** – Helps automatically balance the volume level between different radio systems.

**Priority/Priority w/DND Scan** – Priority channels let you keep track of activity on your most important channels while monitoring other channels for transmissions.

**Priority ID Scan** – Allows you to set priority to talkgroup IDs.
Intermediate Frequency Exchange – Changes the IF used for a selected channel/frequency to help avoid image and other mixer-product interference on a frequency.

Individual Channel Volume Offset – Allows you to adjust the volume offset for each channel.

Configurable Band Defaults – Allows you to set the step (5, 6.25, 7.5, 8.33, 10, 12.5, 15, 20, 25, 50 or 100 kHz) and modulation (AM, FM, NFM, WFM, or FMB) for 31 different bands.

Adjustable Scan/Search Delay/Resume – Set a delay up to 30 seconds or a forced resume up to 10 seconds for each channel or search.

Data Naming – Allows you to name each Favorites List, System, Site, Department, Channel, ID, Location and Custom Search, using up to 64 characters.

Duplicate Input Alert – Alerts you if you try to enter a duplicate name or frequency already stored in the scanner.

100 Quick Keys – You can scan Favorites Lists, Systems, and Departments by assigning them to quick keys.

Search Avoids – You can temporarily Avoid up to 250 frequencies and permanently Avoid up to 250 frequencies in any Search mode or Close Call mode.

10 Custom Searches – Lets you program up to 10 custom search ranges.

Search with Scan Operation – Lets you include Custom Search ranges during scan operation.

3 Search Keys – You can assign 3 of the number keys to start a Custom Search, Tone-Out Search, or Close Call Search.

Quick Search – Lets you enter a frequency and start searching.

Built-in Battery Charger – Allows you to charge the batteries in the scanner.
INCLUDED WITH YOUR SCANNER

Accessories included in the box are:

<table>
<thead>
<tr>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>USB Connection Cable</td>
</tr>
<tr>
<td>3 X AA NiMH Rechargeable Batteries</td>
</tr>
<tr>
<td>microSD card (installed)</td>
</tr>
<tr>
<td>Swivel Belt Clip (attached)</td>
</tr>
<tr>
<td>SMA-BNC Antenna Adaptor</td>
</tr>
<tr>
<td>Rubber Antenna</td>
</tr>
<tr>
<td>AC Adaptor</td>
</tr>
</tbody>
</table>
USING INTERNAL BATTERIES

You can power your scanner using three alkaline or rechargeable AA batteries. There is no switch for the battery type. Using non-rechargeable batteries, select “No” at the Battery message when connecting the USB cable.

1. Install 3 AA batteries, matching the polarity symbols (+ -).
2. Replace the cover.

When Battery icon flashes and the scanner beeps every 15 seconds, replace or recharge the batteries.

Using Rechargeable Batteries

You can also use three rechargeable batteries to power your scanner. Before you use rechargeable batteries, you must charge them. The scanner has a built-in circuit that lets you recharge batteries while they are in the scanner.

If the USB cable is connected to the scanner, or batteries are installed in the scanner when an USB cable is connected, the scanner will check the battery condition.

When the scanner is turned on, the scanner does not charge the batteries.

When the scanner is turned off, the scanner will charge the batteries. The scanner displays “Normal Charging” while charging the batteries according to the Set Charge Time setting.

Caution: If the scanner gets too hot while charging, it will turn off automatically.

If the batteries are not installed, “No Battery” is displayed.

UNDERSTANDING THE MEMORY

All of the information contained in the scanner is stored on a microSD card supplied with the scanner. This includes Favorites Lists and all the radio settings.

FAVORITES LISTS

Because the memory is based on the Radio Reference database we now have a different order of organization not like banks and channels in traditional scanners, but more like Dynamic Memory Architecture. You can now use Favorites Lists that follow RR database structure of Systems that contain Departments that hold the Channels (conventional frequencies or IDs) and then there are Sites to hold just the trunking frequencies. If you are familiar with DMA (Dynamic Memory Architecture) scanners, think of departments as being like channel groups.

Favorites Lists will allow you to store channels you find when you are scanning from the full database (the easiest way). They can contain channels from trunking systems and conventional systems. You can also manually add systems, (not single sites), departments and channels into Favorites Lists from the database as well as program new systems, departments, sites, and channels with the Sentinel software.

You can save up to 256 different lists in the scanner (and software) and associate them with any or all of your profiles. You can monitor one or more lists at a time and/or the database. You can also export you lists to a file to share them. Deleting a profile will not delete the lists associated with a profile. However, deleting a Favorites List will delete it from all profiles.
SYSTEMS

Systems will hold all of your Sites, Departments, and Channels.

TRUNKING SITES

Inside systems are trunked sites hold the trunking frequencies for any trunking system and any band plan information needed. You will need at least one site for each trunked system and some systems can have several sites.

DEPARTMENTS

Departments are also created inside systems. Departments hold frequencies (channels) for conventional systems and IDs (also called channels) for trunked systems.

SENTINEL SOFTWARE

MANAGE PROFILES

Profiles are “snapshots” of your scanner’s set up. A profile contains all your configuration settings as well as all of your Favorites Lists, Avoids, and System settings. Sentinel can save multiple profiles so you can also restore different profiles as you need them. For example, If you regularly visit a specific location, you can create a profile for that location. You can save it to Sentinel to use whenever you visit.

MANAGE FAVORITES LISTS

You can create Favorites Lists in Sentinel and then associate them with specific profiles. Sentinel allows you to create your own systems, or edit systems already in a Favorites Lists. When those profiles are written to your scanner, only specified Favorites Lists are written to the scanner.

HOW TO INSTALL SENTINEL SOFTWARE

If you have not already installed Sentinel software, follow these procedures.
1. Use the USB cable to connect your scanner to your PC.
2. Turn on the scanner if it is not already on. Select Mass Storage.
3. USB Mass Storage displays while it is connected to the PC.
4. The microSD card in your scanner will install to your PC like an additional drive.
5. Open the drive folder and Double-click setup.exe in the Setup folder.
6. When installation is complete, Sentinel software is installed on your PC.
7. You can now disconnect the USB cable.
8. Sentinel will automatically notify you if a more recent version is available.

UPDATING FIRMWARE

Your scanner updates its firmware through Sentinel. In that process, Sentinel connects to the internet and checks for the current firmware version to download.
From time to time, Uniden will release firmware updates to improve existing functionality, add new features, or address issues found in its operation. Updating the firmware takes just a few minutes and is easily accomplished using the Sentinel Software you installed on your PC.

Simply connect your scanner to your PC using the supplied USB cable and select Mass Storage. Then, in Sentinel select UPDATE/Update Firmware and follow the on-screen prompts.
## SETTING UP YOUR SCANNER

### TURN ON THE SCANNER

![Scanner Diagram]

<table>
<thead>
<tr>
<th>Procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Press and hold [\text{电源键}] for about 2 seconds.</td>
</tr>
<tr>
<td>2. If the screen is too dark, tap [\text{电源键}] to turn on the backlight.</td>
</tr>
<tr>
<td>3. Press the scroll control to display the volume level. Turn the scroll control (within 10 seconds) to adjust the volume.</td>
</tr>
<tr>
<td>4. Press the scroll control again to close the volume level (or let it disappear after 10 seconds).</td>
</tr>
<tr>
<td>5. Press \text{Func} then press the scroll control to display the squelch level. Turn the scroll control counter-clockwise all the way then clockwise until the noise stops, then one notch more.</td>
</tr>
<tr>
<td>6. Press the scroll control again to close the squelch level.</td>
</tr>
</tbody>
</table>

*THE FIRST TIME YOU TURN ON YOUR SCANNER IT WILL PROMPT YOU TO SET THE CLOCK. SEE SETTING THE CLOCK.*
**KEYPAD CONTROLS**

<table>
<thead>
<tr>
<th>Key</th>
<th>Operation</th>
</tr>
</thead>
</table>
| Power/Light/Lock | - Press and hold to turn the scanner on or off.  
- Press to use the backlight.  
- Press **Func** then ✂️ to lock or unlock the keypad. |
| **Func** (Function) | Press to enter Function mode for 3 seconds. |
| Scroll Control (Select, Volume, Squelch) | - Press then turn the Scroll Control knob to adjust volume level in Scan mode.  
- Press **Func** then turn the Scroll Control knob to adjust the squelch.  
- Press the Scroll Control knob, then **Func**, then the Scroll Control knob again to view P25 Adjustment mode.  
- Press to select a menu item or save an entry in **Menu** mode.  
- Turn to select characters with Data Naming.  
- Turn to select Scan/Search direction and to continue Scan/Search in Scan/Search modes.  
- Turn to scroll Channel or Frequency in Hold mode.  
- Turn in Department Pause to scroll Departments.  
- Turn in System Pause to scroll Systems.  
- Turn in Site Pause to scroll Site in current system.  
- Turn in Search Pause to select Custom Search Banks to enable in Search mode.  
- Turn to select next or previous recording in Replay mode.  
- Turn to resume Close Call search in Close Call mode.  
- Turn to start a Quick Search Hold mode in Close Call Hold mode.  
- Turn to select Tone-Outs in Tone-Out Standby mode. |

</tbody>
</table>
### Replay/Record
- Press to Replay the last transmissions.
- Press **Func** then Replay to start/stop recording
- Press and hold to Review Recordings.

### Number keys
- Press to select Favorites Lists in Scan mode.
- Press 0-9 to use direct entry in Hold mode.
- Press 0-9 to toggle custom search bands on or off in Custom Search mode.
- Press 0-6 to toggle Close Call bands on or off in Close Call mode.
- Press **Func** then 1, 2, or 3 to enable search keys in Hold mode.
- Press 4(<ATT) to move the cursor to the left when editing text.
- Press **Func** then 4(<ATT) to toggle channel/search/CC attenuation on/off in Hold mode.
- Press **Func** then press and hold 4(<ATT) to toggle Global Attenuation on/off in Hold mode.
- Press 6(>) to move the cursor to the right when editing text.
- Press **Func** then press and hold 6(>) to enter Weather Scan.
- Press **Func** then 7(IFX) to toggle intermediate frequency exchange for a channel/frequency in Hold modes.
- Press **Func** then press and hold 8(REV) to view the repeater frequency in Search mode.
- Press **Func** then 9(DISP) to toggle 3-Line Display mode on/off in Scan Hold mode.
- Press **Func** then 0(LVL) to toggle the volume offset for a channel in Scan Hold mode.

### ./no/PRI
- Press to enter a decimal point for a frequency.
- Press to delete current character with Data Naming/Direct Entry.
- Press to cancel Confirm? prompt.
- Press twice to delete all characters with Data Naming/Direct Entry.
- Press twice to enter a hyphen when entering an ID.
- Press to enter an ‘i’ when entering an I-Call ID.
- Press **Func** then ./no to toggle Priority modes in Scan mode.

### E/yes Q. SRCH
- Press to select a menu item or save an entry in **Menu** mode
- Press to store a blinking CTCSS/DCS/NAC tone in Scan mode.
- Press to store an ID in ID Search mode in Scan mode.
- Press for Advanced Channel Menu in Hold/Receive modes.
- Press to ‘quick store’ a frequency in Search modes.
- Press **Func** then **E/yes** to start Quick Search mode.
- Press **Func** then **E/yes** to toggle ID Search mode on/off in Scan mode (when scanning Trunked System in Favorites List only).
- Press to store found tones in Tone-out Search mode.
- Press to select the current Tone-Out menu in Tone-Out mode.
SET YOUR LOCATION AND RANGE

Press Menu then scroll to Set Your Location and press E/yes.
Scroll to through the following option and press E/yes.

SET LOCATION

Set Manual Location – This will set your exact location and a default scan range of 0 kilometer.
You can then edit the location name and save the location.

Input Latitude. Using the keypad, enter your latitude.
Press .no to toggle N or S, and press E/yes.
Input Longitude. Using the keypad, enter your longitude.
Press .no to toggle E or W, and press E/yes.

Set Up GPS – Sets the location format, serial port baud rate, and units.

Location Format
DMS:DDD°MM'SS.ss or DEG:DDD.dddddd.

Set Serial Port. Default is 4800 bps for GPS device.
Off, 4800, 9600, 19200, 38400, 57600, or 115200 bps.

SET RANGE

Set Range – This setting allows you override the default range setting for your current location
to increase or decrease the number of Trunking Sites and Channel Departments you can receive
when you are scanning from the Full Database and when you are scanning Favorites Lists with
Location Control enabled. See also Understanding Range.

Enter the range (0-80km) and press E/yes.

UNDERSTANDING RANGE

1. The range setting will only work with Favorites Lists that have Location Control set to On
and with Departments/Sites that have locations programmed. If you manually program
Departments/Sites with no location information included, the range setting will have no effect
on them because the scanner doesn’t know where they are.

2. You will receive Departments/Sites that have a range equal to your scan range setting plus
the programmed range of the Departments and Sites. For example, if your scan range is set
to 16 kilometers and a Department/Site range is set to 48 kilometers, and that Department/
Site is less than 64 kilometers away from your current location setting, it will be enabled in
your Favorites List according to both range settings.

EDIT LOCATION

This allows you to create a location or edit a location for rapid recall.

New Location or Edit Location

Edit Name. See Data Naming.

Use Location. This will set the location as current for scanning the Database and
Favorites Lists with Location Control enabled.

At Confirm? Press E/yes or ./no.
**Delete Location.** You can only delete saved locations. The last location set will be retained for use when scanning the Database.

At **Confirm Delete?**, press **E/yes** or **Jno**.

**Set Location Information.** See Set Manual Location.

**Set Range.** Enter the range (0-80km) and press **E/yes**.

**Save Location** – This will save the current location, the range, and set the location as current for scanning the Database and Favorites Lists with Location Control enabled.

See Data Naming to name the location.

---

**SELECTING SERVICE TYPES**

Not all service types are enabled when you set your location in the scanner. By default only Custom 1 is enabled.

The Appendix has a list of Service Types and their general descriptions.

Press **Func** then the Zip/Services button.

Scroll to each Service Type and press **E/yes** to enable or disable.

Press **System** to exit.

When the scanner displays a Service Type that is not in the Favorite Lists, the scanner will display a “---” indication.
NAVIGATING THE MENUS

The Menu key lets you select options to set up and use the scanner. To select a menu item, rotate the scroll control. Rotate right for down and left for up.

The currently-selected menu item is highlighted and reversed in the display. When the menu item you want to select is highlighted, press E/yes or the scroll control to select it. To back up a level, press Menu.

To exit all menus and return to the previous mode, press Avoid.

DATA NAMING

Name any Favorites List, System, Site, Department, Channel, Location, Custom Search, Recording Session, Tone-Out, or SAME group using up to 64 characters.

To Enter a Character, turn the scroll control until the character you want appears.

To move the cursor to the right, press 6(>).
To move the cursor to the left, press 4(<ATT).
To clear a character, press ./no.
To clear all characters, press ./no twice.
Press E/yes when finished to exit.

DISPLAY MENU

Press Menu and then scroll to Display Options and press E/yes.

Scroll to the options below and press E/yes.

<table>
<thead>
<tr>
<th>Set Backlight</th>
<th>Set ID Format (MOT/P25)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adjust Contrast</td>
<td>Set ID Format (EDCS)</td>
</tr>
<tr>
<td>Disp. Unit ID</td>
<td></td>
</tr>
</tbody>
</table>

Setting the Backlight – The scanner will turn on/off the LCD and the Keypad backlight automatically according to backlight setting.

Set Mode

Squelch

Off - The backlight stays off when the squelch opens.
5 sec - The backlight stays on 5 seconds after the squelch opens.
10 sec - The backlight stays on 10 seconds after the squelch opens.

Open Squelch - The backlight stays on only when the squelch is open.

Keypress

Off - The backlight stays off when any key is pressed.
5 sec - The backlight stays on for 5 seconds when any key is pressed.
10 sec - The backlight stays on for 10 seconds when any key is pressed.

Timeout

10 sec - Turns the backlight on for 10 seconds when you press ü/ö.
30 sec - Turns the backlight on for 30 seconds when you press ü/ö.
60 sec - Turns the backlight on for 30 seconds when you press \( \text{on/off} \).

Infinite - The backlight always stays on.

Set Dimmer
High, Middle, or Low

Adjust Contrast – This setting controls the displays contrast.
Contrast 1-15

Display Unit ID – Allows you to view the unit ID of the radio currently transmitting on Motorola, EDACS, and APCO P25 systems.
On or Off

Set ID Format – Sets the ID display format for the System.
Set ID Format (Mot/P25)
Decimal Format or Hex Format. The default setting is Decimal.

Set ID Format (EDACS)
AFS Format or Decimal Format. The default setting is AFS.

View the Battery Level
To view the battery level (in volts) press the scroll control and look at the small numbers in the upper right of the display. Press the scroll control again to close the battery level or let it disappear after 10 seconds.

**SETTINGS MENU**

Press **Menu** then scroll to Settings and press **E/yes**.
Scroll to the options below and press **E/yes**.

- **Adjust Key Beep**
- **Auto Shutoff**
- **Battery Option**
- **Band Defaults**
- **Restore Options**
- **Set Clock**
- **Replay Options**
- **See Scanner Information**
- **Keypad Lock**

**Adjust Key Beep**
Allows you to turn the key beep on or off and adjust the volume level.
Auto sets the alert beep to the master volume level.
- **Off**, **Level 1-15**, or **Auto**

**Battery Option**
- Set **Battery Save**. **On** or **Off**.
- Set **Charge Time**. 1-14 (hours). See also Using Rechargeable Batteries.
- Set **Battery Low**
  - Set **Alert**
    - Set **Alert Tone**. Change tone frequency. (640 Hz, 780 Hz, 920 Hz, 1060 Hz, 1200 Hz)
    - Set **Alert Interval**. Set to a value between 1 and 60 seconds. (Default is 15 sec.)
    - Set **Alert Volume**. 1-15, Off, or Auto. (Default is Auto)
    - Set **Voltage**. 3100 - 3400mV. (Default is 3300mV)

**Band Defaults**
Use this menu to change the default modulation and frequency step or spacing used for each band.
Scroll to each band you wish to edit and press **E/yes**. See also Default Bands.
- **Set Modulation**
  - AM, NFM, FM, WFM, or FMB (Broadcast).
- **Set Step**
  - 5, 6.25, 7.5, 8.33, 10, 12.5, 15, 20, 25, 50, or 100 kHz.

**Auto Shutoff**
Allows you to set the scanner to shut off after a set time.
- **Off**, **5**, **10**, **15**, **30**, **45** min, **1**, **2**, **3** hours.

**Set Clock**
Sets the clock for the display and the default tag for recordings.
- **Set Date**
  - **Set Year**. Enter the year (2013-2099).
  - **Set Month**. Enter the month.
  - **Set Day**. Enter the day.
- **Set Time**
  - **Set Hour**. Enter the Hour (0-23).
Set Minute. Enter the minute.

Set Time Zone
Scroll to your time zone.

Set Daylight Saving
On or Off

Replay Options
This allows you to set the recording duration and delete, replay, or rename recording sessions.

Set Replay Duration
30, 60, 90, 120, 150, 180, 210, or 240 sec.

Review Recordings
Recording Session
Play Session. See Replaying Transmissions.
Delete Session
At Confirm Delete? Press E/yes or J/no.
Rename Session. See Data Naming.

Restore Options
Allows you to clear all user data (full reset) or reset just scanner settings to default.

Clear User Data
(Full Reset) will delete all Favorites Lists, locations, reset all profile options to default, clear all Avoids, delete all recording sessions, all discovery logs, and all weather event records.

Note: Pressing and holding 2, 9, and Dept when you power on the scanner will also clear all user data.

Reset User Settings
Will only reset all scanner settings; the Favorites List will be saved.

See Scanner Information
This will show you how much memory is in use, the firmware version, and scanner serial number.

Keypad Lock
The only keys/knobs that work when the keypad is locked are Channel for hold mode, \s\s\s, Func, and the Scroll Control for volume.
Press Func then \s\s\s to toggle the keypad lock.
KEY CONCEPTS

QUICK KEYS
Organizing your Quick Keys will be part of the planning. You will have to figure out which quick keys to assign to your Favorites Lists, Systems, and Departments so you can scan them without a table of contents and with some sort of logic you can remember. Remember, enabling/disabling quick keys is not the same thing as Avoiding or Unavoiding Systems/Department and Monitor On/Off Favorites Lists.

FAVORITES LIST QUICK KEYS
Favorites Lists Quick Keys are used to enable or disable Favorites Lists for scanning. They are just the number keys on the scanner but once assigned to a Favorites List they become the Quick Keys. Your Favorites Lists hold your Systems that also may have System quick keys assigned to those Systems. You cannot assign a Quick Key in one Favorites List to another Favorites List. Selecting a Favorites List will enable all (Unavoided) Systems in that list for scanning. There are 100 Quick Keys (0-99) to use for your Favorites Lists. Favorites List Quick Keys can only be assigned once to any one Favorites List. If you don’t assign a Quick Key to a list, it will always be enabled.

SYSTEM QUICK KEYS
System Quick Keys are used to enable or disable conventional and trunking systems for scanning. You can assign any quick key to one or more Systems, or program one or more systems with no quick key assigned that will always be scanned unless you Avoid it. There are also 100 Quick Keys (0-99) to use for your Systems.

DEPARTMENT QUICK KEYS
Department Quick Keys enable or disable conventional and trunking systems for scanning. You can assign any quick key to one or more Departments, or program one or more Departments with no quick key assigned so that these Departments will always be scanned unless you Avoid it. There are also 100 Quick Keys (0-99) to use for your Departments.

It is best to assign Quick Keys to everything to easily access your Favorites List and System/Department. See also Scanning and Quick Key scanning order.

SEARCH KEYS
You can assign any Search Keys (1, 2, or 3) to any Custom Search range, Tone-Out Search, or Close Call Only Search for quick access to your favorite searches.

PLANNING PROFILES

STARTUP KEYS
You can program each of your Favorites Lists with a Startup Key (0-9) so that when you power up the scanner and press the key number, just those Favorites List(s) assigned to the key will be enabled for scan. Systems are not affected.
NUMBER TAGS

Numbers tags will allow you to tag each Favorites Lists, System, and Channel to locate easier. Number tags can range from 0 to 99 for Favorites Lists and Systems and 0-999 for Channels. You can assign number tags to channels even if the Favorites List does not have a number tag but, without a Favorites List number tag, you can only navigate to these channels while holding or scanning in that Favorites List. See also Using Number Tags.

ALERTS

You can program your scanner to alert you when, a Channel or Unit ID is received, you receive a Close Call hit, an ID is transmitted with an Emergency Alert or you receive a Tone-out hit. For each alert in the scanner, you can select from 9 different tone patterns, 15 volume settings, 7 colors, and 3 color patterns.

MANAGING FAVORITES LISTS

Favorites Lists hold all your Systems, Sites, Departments, and Channels. You should assign a Quick Key to every Favorites List to quickly enable or disable the list. You can assign a Favorites List to a Favorites List Quick Key.

NEW FAVORITES LIST/ FAVORITES LIST OPTIONS

- Review/Edit System
- Stop All Avoiding
- Set FL Quick Key
- Rename
- Set FL Number Tag
- Delete
- Det FL Startup Key
- Information
- Use Location Control
- Review Avoids

Set FL Quick Key – This assigns a quick key to the Favorites List and will scan the list when the key is enabled. The default setting is . (no quick key). If you don’t assign a Favorite Lists to a quick key, it will always be scanned unless you turn it off in Select Lists to Monitor. See also Select Lists to Monitor.

Scroll to the quick key number (0-99 or . for no quick key) and press E/yes to save.

Note: Pressing the first number of a 2-digit quick key will get you closer, 1 for 10, 2 for 20, etc., then scroll to second digit.

Set FL Number Tag – This allows you to number a Favorites List so you can access it quickly from scan hold mode.

The default setting is no number tag. See also Using Number Tags.

Enter the number tag (0-99) and press E/yes to save. Enter a blank for no number tag.
Set FL Startup Key – This allows you to turn on the scanner with the Favorites List enabled for scan. The default settings are all keys Off.

See also Using Startup Keys.

Scroll to each key (0-9) and press E/yes to enable then press Menu to save.

Use Location Control – This enables Location Control for the Favorites List. The default setting is Off. See also Understanding Location Control.

Review Avoids – This allows you to review all Avoids for the Favorites List. Temporary Avoids appear reversed in the display - AVOID .

Scroll to each Avoided channel, Department, or System, and press E/yes to Stop Avoiding.

Stop All Avoiding – This will Stop Avoiding all Channels, Departments, and Systems in the Favorites List.

At Confirm Delete? Press E/yes or ./no.

MANAGING FAVORITES LISTS

Rename – This allows you to rename the Favorites List.

See Data Naming.

Delete – This will delete the Favorites List.

At Confirm Delete? Press E/yes or ./no.

Information – This will show you the file size and number of Systems in the list.

UNDERSTANDING LOCATION CONTROL

Location Control allows you to enable or disable channels scanned in a Favorites List based on your location. Actually, it enables/disables Sites and Departments in Favorites Lists (as long as they have locations programmed) based on your current location and scan range settings. Location Control is always enabled when scanning from the Full Database.

To use Location Control, you have to enable it for each Favorites List (default is OFF). You also need to have locations programmed for Sites and Departments in each list (you can't program a location for a system).

With Location Control set to ON, the scanner only sees Departments/Sites with programmed locations. Any Department/Site with no location information programmed will not be scanned. If you append (add) a System/Department to a list from the database, the locations will be brought in with each System/Department you append.

With Location Control set to OFF, the scanner will enable all Sites and Departments in your Favorites List no matter what the scan range or Site/Department range is set to.

You don't need a GPS to scan by location if all of the following apply:

1. You have Location Control set to ON for each Favorites List you want to use with Location Control.
2. You set manually or select a location.
3. Your Departments and Sites have locations programmed.

The scanner then compares your location data with Site and Department data to determine which channels to scan.

Conceivably, you could program everything you want to hear into one Favorites List and scan just by selecting locations rather than enabling/disabling lists. If you are traveling long distances a GPS device would be a better way to go.
PROGRAMMING SYSTEMS

Note for Motorola/P25 systems: If you are not sure if the system is Motorola or P25, look at the system type in the RR database for your system. Only those systems tagged as “Project 25 Phase I or Project 25 Phase 2” are Project 25 systems. Any system type that includes the word “Motorola” should be programmed as a Motorola system, even if it uses some or all digital channels.

NEW SYSTEM/SYSTEM SETTINGS

Press Menu then scroll to Manage Favorites and press E/yes.

Scroll to the Favorites List and press E/yes.

To Create a New System, scroll to New System and press E/yes.

Scroll to P25 Trunk, P25 X2-TDMA, P25 One Frequency, Motorola, MOTOTRBO Trunk, DMR One Frequency, EDACS, LTR, or Conventional and press E/yes.

At Confirm? press E/yes or ./no.

To Edit System Settings, scroll to the System and press E/yes.

SYSTEM SETTINGS

<table>
<thead>
<tr>
<th>Edit Name</th>
<th>Copy System</th>
</tr>
</thead>
<tbody>
<tr>
<td>Edit Unit ID</td>
<td>Edit System</td>
</tr>
</tbody>
</table>

Edit Name – Enter a name and press E/yes. See Data Naming.

Edit Unit IDs – Unit ID must be set to On in the Display Options menu to view Unit IDs.

New Unit ID/Edit Unit ID
Enter the Unit ID and press E/yes.

Edit Name See Data Naming.

Set Alert Tone
Alert 1-9 or Off.

Set Level
Level 1-15 or Auto (the master volume level).

Set Alert Light
Set Color
Off, Blue, Red, Magenta, Green, Cyan, Yellow, or White.

Set Pattern
On, Slow Blink, or Fast Blink.

Delete Unit ID
At Confirm Delete?, press E/yes or ./no.

New Unit ID
See New Unit ID.

Copy System – Copying a system will copy all Sites, Departments, Channels, and settings including quick key assignments into the current Favorites List.

See Data Naming to name the new system.

Delete System
At Confirm Delete?, press E/yes or ./no.
SYSTEM OPTIONS

Press **Menu** then scroll to **Manage Favorites** and press **E/yes**.

Scroll to the **Favorites List** and press **E/yes**.

Scroll to **Review/Edit System** and press **E/yes**.

Scroll to the **System** you want to edit and press **E/yes**.

Scroll to **Edit Sys Option** and press **E/yes**.

*Note: Not all options will appear for all types of systems.*

<table>
<thead>
<tr>
<th>Set Quick Key</th>

<td></td>
<td>Digital Threshold Level</td>
</tr>
</tbody>
</table>

**Set Quick Key** – This assigns a quick key to the System and the scanner will scan the System when the key is enabled. The default setting is . (no quick key). If you don’t assign a Quick Key to a system, it will always be scanned unless you Avoid it.

0-99 or . for no quick key.

*Note: Pressing the first number of a 2-digit quick key will get you closer, 1 for 10, 2 for 20, etc., then scroll to second digit.*

**Set Number Tag** – This allows you to number a System so you can access it quickly from Scan Hold mode.

The default setting is no number tag. See also Using Number Tags.

Enter the number [0-99, Blank (no number tag)] and press **E/yes** to save.

**Set Avoid** – This determines whether a System will be scanned or not (even if the system is enabled). Temporary Avoids cancel when you cycle power.

The default setting is **Stop Avoiding**.

**Stop Avoiding, Temporary Avoid, or Permanent Avoid**

See also Scan Avoids.

**Set Hold Time** – This sets (in seconds) the amount of time the scanner will scan the System before moving on to the next system. All (Unavoided) channels will be scanned at least once regardless of this setting. The scanner moves to the next system after the hold time expires, any current transmission ends, and the channel delay time expires. The default setting is 0 seconds.

Enter the hold time and press **E/yes** to save.

0-255

**ID Search** – This sets whether the scanner searches for all IDs in a trunking system (On), or scans only programmed IDs (Off).

The default setting is **Off**. See also ID Toggle ID Scan or Search.

On or Off
**Edit Fleet Map (Motorola Type l/lli systems Only)** – This allows you to program a fleet map for Motorola Type I Systems. You must program a system fleet map in order for the scanner to properly track and display talk group IDs.

1. Block 0 Scroll to the size code (0-14) and press E/yes. The next available block is prompted to select the next size code (0-14).
2. Repeat for each block as needed (0-7).

**Note:** If you select size code 12, 13, or 14, these restrictions apply:
- 12 can only be assigned to Blocks 0, 2, 4 or 6.
- 13 can only be assigned to Blocks 0 and 4.
- 14 can only be assigned to Block 0.

Since these size codes require multiple blocks, you will be prompted for the next available block. Example: If you assign Block 0 as 12, the scanner prompts you for block 2, the next block available, instead of block 1.

**Priority ID Scan (no P25 One Freq)** – This allows you to use Priority Scan with IDs in the System. The default setting is Off.

- **On** or **Off**

**Set Status Bit (Motorola Only)** – This sets how your scanner works with Status Bits (also called S-bits), letting you control how the scanner interprets and displays Motorola talk group IDs. The default setting is Ignore.

- **Yes**. The scanner treats all received IDs as unique IDs.
- **Ignore**. The scanner rounds all received IDs down to the next interval of 16.

**Set End Code (Motorola Only)** – This sets how the scanner handles the transmission end code sent by most Motorola Systems.

The default setting is Analog.

- **Analog**. The scanner recognizes only analog end transmission codes.
- **Analog+Digital**. The scanner recognizes both analog and digital end codes.
- **Ignore**. The scanner waits for the carrier to drop before leaving a channel.

**Emergency Alert (Motorola/EDACS Only)** – This sets how your scanner alerts you to IDs that have the emergency flag set. The default setting is Off.

1. **Set Alert Tone**
   - Alert 1-9 or Off.
2. **Set Level**
   - Level 1-15 or Auto (the master volume level).

1. **Set Alert Light**
2. **Set Color**
   - Off, Blue, Red, Magenta, Green, Cyan, Yellow, or White.
2. **Set Pattern**
   - On, Slow Blink, or Fast Blink.

**Review ID Avoids** – This allows you to review Avoided IDs in the System. Temporary Avoids appear reversed in the display: AVOID.

1. **Stop Avoiding**?. Scroll to ID and press E/yes to Stop Avoiding.
2. **Nothing Avoided** appears if nothing is Avoided.

**Clear All ID Avoids** – This allows you to Stop Avoiding all Avoided IDs in the System.
At Confirm?, press E/yes or ./no.

Nothing Avoided appears if nothing is Avoided.

Set Audio AGC – This allows you to turn AGC (Automatic Gain Control) on or off for the System. The default settings are Off.
  Analog - Press E/yes to toggle On or Off.
  Digital - Press E/yes to toggle On or Off.

P25 NAC Option (P25 One Freq) – This allows you to have the scanner search for NAC codes or you can program a specific code for the System.
The default setting is Search.
  Search. The scanner opens squelch for any digital signal and displays the NAC being used.
  Set P25 NAC. The scanner opens squelch only for signals that include the programmed NAC.
  At Input P25 NAC, see Data Naming.

Digital Waiting Time (Conventional Only) – This setting gives the scanner time to determine if channels on Conventional Systems have digital or analog transmissions. During this time, the scanner will evaluate the received signal and, if it detects digital data, will open squelch immediately. If digital is not detected before the delay expires, the scanner will open squelch at the end of this delay. This is to prevent “false decode” problems. This setting only affects conventional channels with an Audio Type set to All. The default setting is 400 ms.
  0 to 1000

Note: Any analog transmissions will lose the first part of the transmission, up to the wait time you set here.

Digital Threshold Mode – (Conventional Only)
The default setting is Auto.
  Auto. Automatically sets the decode threshold based on the received signal.
  Manual. Allows you to manually set the threshold in threshold setting mode by using the Digital Threshold Level setting.
  Default. Sets the scanner to the default threshold of 8, Auto.

Digital Threshold Level (Conventional Only) – The default setting is 8.
  0 to 20

PROGRAMMING SITES

NEW SITE/SITE OPTIONS
Press Menu then scroll to Manage Favorites and press E/yes.
Scroll to the Favorites List and press E/yes.
Scroll to the System and press E/yes.
Scroll to Edit Site and press E/yes.
  To Create a New Site, scroll to New Site and press E/yes.
  To Edit an Existing Site, scroll to the Site and press E/yes.

Note: Not all options will appear for all sites.
Edit Name

See Data Naming.

Set Site Type (EDACS Only) – EDACS Wide is the same as EDACS Standard and use a 9600 baud control channel. EDACS Narrow-band sites use a 4800 baud control channel.

Wide (Standard) or Narrow. The default setting is Wide.

Set Band Plan (Motorola/P25 Only) – Band plans are required so the scanner can correctly determine the voice channel frequencies.

P25 Systems. Explicit mode systems (which comprise most systems in use) include all information needed to determine voice frequencies on the control channel, leave all entries blank. The system will automatically detect the band plan and fill in the entries. Implicit systems need you to supply the systems band plan with the Custom option for the scanner to correctly determine voice frequencies.

Select Plan - Scroll to each Band Plan 0-9, A-F, and press E/yes.
Input Base Freq - Enter the base frequency press E/yes.
Input Spacing - Enter the step size and press E/yes.
Press Menu to return and repeat for each band plan as needed.

Motorola Systems

800/900 Standard or 800 Splinter
The scanner will use the regular Motorola band plan.

Custom Motorola/VHF/UHF Systems. Custom band plans require that you enter both a lower and an upper base frequency value. The lower base frequency (or base) is always the base frequency as provided in the Radio Reference Database.

Use this Excel spreadsheet to calculate the upper base frequency value located at: http://info.uniden.com/twiki/pub/UnidenMan4/CalculatingUpperBaseFrequencies/CustomBandPlanCalculator.xls
If you don’t have Excel you can download and install a viewer here, or do a simple Google search.

The upper base frequency can also be found using the Band Plan Calculator located at: http://info.uniden.com/twiki/bin/view/UnidenMan4/CalculatingUpperBaseFrequencies.

Select Plan 1-6 Select for each Band Plan.

Set Base Freq
Input Lower. Enter the lower base frequency and press E/yes.
Input Upper. Enter the upper base frequency and press E/yes.

Set Offset
Input Offset. Enter the offset and press E/yes.
Select Polarity. Scroll to + (default) or - and press E/yes.
Set Spacing. Scroll to the step size and press E/yes.
Press Menu to return and repeat for each band plan as needed.

Set Frequencies – This is where you program trunking frequencies for the Site.

New Frequency/Edit Frequency. Enter the frequency and press E/yes.
For EDACS and LTR sites only:
Input LCN. Enter the LCN number and press E/yes.

Delete Frequency
At Confirm Delete?, press E/yes or ./no.

Set Modulation (no P25/P25 One Freq) – This setting selects the modulation used for the Site.
The default setting is Auto.

Auto, NFM, or FM
See also Scan Modulation.

Set Attenuator – This setting controls whether the scanner attenuates signals on the Site by about 20 dB. The default setting is Off.

On or Off
See also Scan Attenuation.

Set Avoid – This determines whether a Site will be scanned or not. Temporary Avoids cancel when you cycle power. The default setting is Stop Avoiding.

Stop Avoiding, Temporary Avoid, or Permanent Avoid
See also Scan Avoids.

Set Location Information – This allows you program a location for the Site to use with Location Control enabled or with a GPS. You can program a circle with a radial range or multiple rectangles as a location.

See Set Up GPS first to set your location format and the Baud rate.

Circle

Set Latitude
Enter the latitude. Press .no to toggle N or S, and press E/yes.

Set Longitude
Enter the longitude. Press .no to toggle E or W, and press E/yes.

Set Range See also Understanding Range.
0-6000

Rectangles

New Rectangle
Latitude - Top Left
Enter the latitude. Press .no to toggle N or S, and press E/yes.

Longitude - Top Left
Enter the longitude. Press .no to toggle E or W, and press E/yes.

Latitude - Bottom Right
Enter the latitude. Press .no to toggle N or S, and press E/yes.

Longitude - Bottom Right
Enter the longitude. Press .no to toggle E or W, and press E/yes.

Stored Rectangle
Edit Rectangle See Rectangles above.
Delete Rectangle

At Confirm Delete? press E/yes or .no.

Digital Waiting Time (Motorola Only) – This setting gives the scanner time to determine if channels on mixed Motorola Systems have digital or analog transmissions. During this time, the scanner will evaluate the received signal and, if it detects digital data, will open squelch immediately. If digital is not detected before the delay expires, the scanner will open squelch at the end of this delay. This is to prevent “false decode” problems. This setting only affects channels with an Audio Type set to All. The default setting is 400 ms.

0 to 1000

Note: Any analog transmissions will lose the first part of the transmission, up to the wait time you set here.

Digital Threshold mode (P25/Motorola/MOTOTRBO)
The default setting is Auto.

Auto. Automatically sets the decode threshold based on the received signal.
Manual. Allows you to manually set the threshold in threshold setting mode by using the Digital Threshold Level setting.
Default. Sets the scanner to the default threshold of 8, Auto.

Digital Threshold Level (P25/Motorola/MOTOTRBO) – The default setting is 8.

0 to 20

Delete Site – Deletes the Site.
At Confirm Delete? press E/yes or .no.

New Site – See New Site.

PROGRAMMING DEPARTMENTS

NEW DEPARTMENT/DEPARTMENT OPTIONS

Press Menu then scroll to Manage Favorites and press E/yes.
Scroll to the Favorites List and press E/yes.
Scroll to the System and press E/yes.
Scroll to Edit Department and press E/yes.

To Create a New Department, scroll to New Department and press E/yes.
To Edit an Existing Department, scroll to the Department and press E/yes.

DEPARTMENT OPTIONS

Edit Name

Set Location Information
Delete Department

Set Department Quick Key

Edit Channel

Set Avoid

New Department

Edit Name
See Data Naming.

Set Department Quick Key
This assigns a quick key to the Department and the scanner will scan the Department when the key is enabled. The default setting is (no quick key). If you don’t assign a Quick Key to a department, it will always be scanned unless you Avoid it.

0-99 or . (for no quick key)

Note: Pressing the first number of a 2-digit quick key will get you closer. For example, press 1 for 10, 2 for 20, etc., then scroll to the second digit.

Edit Channel
See Channel Options.

Set Location Information – This allows you to program a location for the Department to use with Location Control enabled or with a GPS. You can program a circle with a radial range or multiple rectangles as a location.
See Set Up GPS first.

Circle
Set Latitude
Enter the latitude. Press .no to toggle N or S, and press E/yes.
Set Longitude
Enter the longitude. Press .no to toggle E or W, and press E/yes.
Set Range See also Understanding Range.

0-6000

Rectangles
New Rectangle
Latitude - Top Left
Enter the latitude. Press .no to toggle N or S, and press E/yes.
Longitude - Top Left
Enter the longitude. Press .no to toggle E or W, and press E/yes.
Latitude - Bottom Right
Enter the latitude. Press .no to toggle N or S, and press E/yes.
Longitude - Bottom Right
Enter the longitude. Press .no to toggle E or W, and press E/yes.

Stored Rectangle
Edit Rectangle See Rectangles above.
Delete Rectangle
At Confirm Delete? press E/yes or .no.

Set Avoid – This determines whether a Department will be scanned or not. Temporary Avoids cancel when you cycle power.
The default setting is Stop Avoiding.

Stop Avoiding, Temporary Avoid, or Permanent Avoid
See also Scan Avoids.

Delete Department – Deletes the Department.
At Confirm Delete? press E/yes or .no.

New Department – See New Department.
PROGRAMMING FREQUENCIES/TGIDS

QUICKLY STORING A FREQUENCY/TGID

In scan mode press Channel to hold on any channel.
Enter the Frequency or TGID and press E/yes. See also Edit Frequency/TGID.

Note: You have to enter a TGID/frequency in the proper format for the system you are holding on. Example: You can’t enter a Motorola Type II TGID when holding on an LTR system.

Store a Frequency/TGID into a “Quick Save” Favorites List
At Quick Freq/TGID Save?, press E/yes.
The scanner will save the Frequency/ TGID in a Favorites List called Quick Save Favorites List, in a System called Quick Save System, (with no quick keys assigned), in a Department called Quick Save Department.

Store a Frequency/TGID into a Current Favorites List
At Quick Freq/TGID Save?, press /no.
At inquiry Press E/yes.
At Select Favorites List, scroll to the Favorites List where you want to store the Frequency/TGID and press E/yes.
At Select System, scroll to the System where you want to store the Frequency/TGID and press E/yes.
At Select Department, scroll to the Department where you want to store the Frequency/ TGID and press E/yes.
After storing the Frequency/TGID, you will be at the Channel Options menu to complete the settings for the new channel. If you don’t want to edit the channel settings press Avoid to return.

NEW CHANNEL/CHANNEL OPTIONS

Press Menu then scroll to Manage Favorites and press E/yes.
Scroll to the Favorites List and press E/yes.
Scroll to the System and press E/yes.
Scroll to Edit Department and press E/yes.
Scroll to the Department and press E/yes.
Scroll to Edit Channel and press E/yes.

To Create a New Channel, scroll to New Channel and press E/yes.
At Input Frequency/TGID, enter the frequency or TGID and press E/yes.
To Edit an Existing Channel, scroll to the Channel and press E/yes.
CHANNEL OPTIONS

Note: Not all options will appear for all channels.

<table>
<thead>
<tr>

</table>

Edit Name

See Data Naming.

Edit Frequency or TGID

Enter the frequency or TGID and press E/yes to save. See also Entering IDs for Partial IDs.

To enter a Conventional Frequency, enter the Frequency and press E/yes.

To enter a Motorola Type II TGID, enter the TGID and press E/yes.

To enter a Motorola Type I TGID, enter the Block Number and Fleet Number, press .no twice for a hyphen, then enter the Subfleet and press E/yes.

To enter an EDACS ID in AFS format, enter the Agency Number, press .no twice for a hyphen, then the Fleet and Subfleet and press E/yes.

To enter an EDACS TGID in Decimal format, enter the TGID and press E/yes.

To enter a LTR TGID, enter the Area Code (0 or 1) and press .no twice for a hyphen, then enter the Home Repeater Number (01-20) and press .no once, then the User ID (1-254) and press E/yes.

To enter an I-Call ID, press .no once then enter the ID and press E/yes.

To enter a Wildcard I-Call ID, press .no once then enter 0 and press E/yes.

To enter Hexadecimal IDs, see Data Naming.

Note: If the channel is already stored in the group TGID or Frequency Exists Accept? (Y/N) appears. Press .no to return. You can also Avoid wildcard IDs.

Set Audio Type (Conventional/Motorola Only) – Select All if this channel might contain both digital and analog signals. If you are sure the channel is analog set the channel to Analog Only. This will prevent the Digital Waiting Time for the conventional system from losing the first part of the transmission up to the wait time you set there.

All. The scanner determines whether the audio is analog or digital.

Digital Only. The scanner will receive the channel only if it is carrying APCO 25 digital audio.

P25 NAC Option (Conventional Only)

Search - the scanner searches and displays any NAC tone received.

Set P25 NAC - allows you to program a NAC code. See Data Naming.

Note: You can also store a (blinking) NAC code when receiving the frequency in scan mode by pressing E/yes.

Set DMR Color Code.

Analog Only. The scanner will only receive analog audio.

Set CTCSS/DCS

Search. The scanner searches and displays any CTCSS or DCS tone.
Note: You can also store a (blinking) CTCSS/DCS tone when receiving a frequency in scan mode by pressing E/yes.

CTCSS. Scroll to the desired CTCSS tone. Press E/yes to save.

DCS. Scroll to the desired DCS tone. Press E/yes to save.

Set Lockout. Scroll to CTCSS or DCS and press E/yes.

Scroll to the desired tone you want avoided and press E/yes to save.

Set Number Tag – This allows you to number a Channel so you can access it quickly from scan hold mode.

The default setting is no number tag. See also Using Number Tags.

0-999, Blank (No number tag)

Set Modulation (Conventional Only) – This setting selects the modulation used for the channel. The default setting is Auto.

Auto, AM, FM, NFM, WFM, or FMB (FM Broadcast)

See also Scan Modulation.

Set Attenuator (Conventional Only) – This setting controls whether the scanner attenuates signals on the Channel by about 20 dB.

The default setting is Off.

On or Off

See also Scan Attenuation.

Set Service Type – This sets the Service Type for The Channel.

The Appendix has a list of Service Types and their general descriptions.

Default is Custom 1.

Scroll to the Service Type and press E/yes.

Set Delay Time – This sets (in seconds) the amount of time the scanner stays on a channel after the transmission has ended before moving to the next channel. A negative delay will force a resume after that number of seconds.

The default setting is 2 seconds.

-10, -5, 0, 1, 2, 3, 4, 5, 10, or 30 sec.

Set Priority – This sets the channel as a priority channel while scanning. The default setting is Off.

Note: To use Priority ID Scan you must also enable Priority ID Scan for each System. See also Priority Scanning.

On or Off

Set Alert – This setting controls when and how the scanner alerts you if the channel becomes active. The default setting is Off.

Set Alert Tone

Alert 1-9 or Off.

Set Level

Level 1-15 or Auto (the master volume level).

Set Alert Light

Set Color

Off, Blue, Red, Magenta, Green, Cyan, Yellow, or White.

Set Pattern

On, Slow Blink, or Fast Blink.
Set Avoid – This determines whether a channel will be scanned or not. Temporary Avoids cancel you cycle power. The default setting is Stop Avoiding.

Stop Avoiding, Temporary Avoid, or Permanent Avoid
See also Scan Avoids.

Volume Offset – This sets the Volume Offset for the Channel.

-3, -2, -1, 0, 1, 2, or 3

Note: You can also toggle volume offset for a channel in scan hold mode by pressing Func then 0(LVL).

Delete Channel – Deletes the Channel.

At Confirm Delete? press E/yes or /no.

New Channel – See New Channel.

SET SCAN SELECTION

Manage Quick Key Status – This is one way to enable or disable your System quick keys and Favorites Lists quick keys. The other way is using the number keys on the keypad. See Selecting Quick Keys.

Favorites Quick Key
Scroll to each Favorites List quick key and press E/yes to enable or disable.

System Quick Key
Scroll to each Favorites List and press E/yes.

Favorites List
Scroll to each System quick key and press E/yes to enable or disable.

Select Lists to Monitor – This setting enables or disables your Favorites Lists for scanning. You must first enable each list here, before you can enable the quick key for the list or you will see Nothing to Scan.

Note: You will need to set a location to enable the database.

Scroll to the Search with Scan, or each Favorites List, then press E/yes to enable or disable.

For Search with Scan, see also Search with Scan and Edit Custom Search.

Set All Lists Off/On – These settings turn all Favorites Lists on or off.

Select Set All Lists Off/On then press E/yes to toggle each setting.

USING STARTUP KEYS

TO USE A STARTUP KEY:

1. Turn the scanner off.
2. Press and hold the number key that corresponds to the startup key when you turn the scanner on.
3. Continue holding the number key until the scanner display shows the number of the startup key configuration

When you use Startup Configuration, the scanner checks all Favorites Lists and:

1. Favorites whose Startup Key matches the one the user pressed are changed to Monitor Status ON.
2. Favorites whose Startup Key DOES NOT match the one the user pressed are changed to Monitor Status OFF.
Caution: If you press the wrong key when you press the power key to set your startup configuration, and that wrong key doesn't have any Favorites Lists assigned to that key, you will start up your scanner with all systems Avoided-Nothing to Scan.

PRIORITY SCANNING

Priority Scan – When the scanner is scanning a Conventional System, it interrupts scanning, based on the Priority Interval and Max Channels settings, to check priority channels for activity. The more channels you have set to priority, the longer the interruption will be. The Favorites List(s) and System(s) containing the priority channel(s) have to be enabled (and not Avoided) or the scanner will display Priority Scan No Channel.

Priority ID Scan – This function is similar to conventional priority although there is no interruption during the transmission. Priority is checked in between transmissions, when the scanner is receiving the control channel, and during the channel delay period. The scanner can only look for priority IDs in the trunked system it is currently scanning.

Priority DND – The scanner checks priority channels, based on the Priority Interval and Max Channels settings, only when not receiving other conventional channels so there is no interruption in scanning with conventional systems.

The highest priority is for channels in System and Department Quick Key 0. The lowest priority is for channels in System and Department Quick Key 99. Priority for priority channels in the same channel Department follows the order in which the channels were created.

To use Priority Scan, you must first set your Priority Channels.

To use Priority ID Scan, you must also enable Priority ID Scan for each system.

To Toggle Priority Modes, press Func then Jno(Pri).

PRIORITY SCAN OPTIONS

Press Menu then scroll to Priority Scan and press E/yes.

Set Priority Set Interval MaxChannels/Pri-Scan

Set Priority – Sets the Priority mode. You can also toggle these modes by holding on any channel in scan mode and pressing Func then Jno(Pri).

Off - The Priority feature is off.

Priority DND - The scanner checks Priority channels only when not receiving other conventional channels.

PRI appears in the display reversed - PRI.

Priority Scan - The scanner checks conventional priority channels.

PRI appears in the display - PRI.

Set Interval – This sets (in seconds) how often the scanner will check the priority channels.

1-10 sec.

MaxChannels/Pri-Scan – This sets the maximum number of priority channels that are scanned during one priority scan interrupt. If there are more priority channels than the value you select, the channels are divided into more than one group and the scanner scans each group in turn. Example: If you set the maximum channels to 20 and there are 100 priority channels, the scanner checks those 100 channels in groups of 20 and takes a total of 5 intervals to complete the priority scan.

1-100
SCANNING BY ASSIGNING QUICK KEYS

With previous scanners, you selected banks to scan. With this scanner, you select Favorites List, Systems, and Departments to scan by assigning Quick Keys to them.

See also Understanding Quick Keys.

Scanning is performed with a mixture of FLQK, SQK, and DQK order. The scanner will not scan all Systems in one Favorites List and then move to the next List.

For each Favorites List, starting with 0, the scanner will scan each 0 SQK in FLQK order and then move to the next set of SQKs for each list.

Example:

FLQK 0, SQK 0; FLQK 1, SQK 0…. FLQK 98, SQK 99; FLQK 99, SQK, 99.

Systems with the same quick key are scanned in order of creation.

The Database is scanned next, in order of creation. Then, Systems with no quick key (including created Quick Save Systems) are scanned and in order of creation.

Departments within Systems are also scanned the same as Systems.

Conventional Channels within Systems are also scanned in order of creation.

IDs are not really scanned. The scanner checks for any activity in the trunking system and:

• Will display all IDs when ID Search mode is set to On.
• Will display only programmed IDs when ID Search mode is set to Off.

Next, any Custom Searches (enabled for Search with Scan) are scanned in order.

Then, the scanner scans the Close Call ‘Hits with Scan’ system (if Unavoided). This is a system that automatically stores the frequencies found by Close Call. If the ‘Hits with Scan’ system has no frequencies, the scanner will not scan the system.

The scanner scans a system for the duration you set using the System Hold Time option. For trunked systems, the scanner moves to the next system after the hold time expires, the current transmission ends, and the channel delay expires. Conventional systems operate similarly, but all (Unavoided) channels are scanned at least one time regardless of the hold time setting.

Scanning Checklist:

1. You must enable at least one Favorites List or the Full Database in Select Lists to Monitor.
2. Favorites Lists, Systems, or Departments with Quick Keys assigned to them must be enabled with quick keys or through Manage Quick Key Status for Favorites Lists or Systems.
3. Service Types required for channels must be set to On.

Any Favorites List not assigned to a quick key, not Avoided, and set to On in Select – to Monitor will be scanned.

Any Departments not assigned to a quick key and not Avoided will be scanned.

Any System not assigned to a quick key and not Avoided, will be scanned.
SELECTING QUICK KEYS

Select a Favorites List Quick Key – Press the number key(s) assigned to the Favorites List then press E/yes. Example: 00, E/yes to enable or disable List 0.

Select a System Quick Key in the Current List – Press ./no, then the number key (2 digits) assigned to the System.
Example: ./no, 03, E/yes to enable or disable System 3.

Select a Department Quick Key in the current List – Press ./no twice, then the number key (2 digits) assigned to the Department.
Example: ./no twice, 07, E/yes to enable or disable Department 7.

Select a System Quick Key in a Different List – Press the number key(s) assigned to the Favorites List then ./no, then the number key (2 digits) assigned to the System then E/yes.
Example: 00, ./no, 04, E/yes to enable or disable List 0, System 4.
TOGGLE DISPLAY MODES

Hold on any channel and press Func then 9(DISP). Press Channel to resume. You can turn on Disp. Unit ID on and off.

TOGGLE ID SCAN OR ID SEARCH

While scanning each Trunked System, press Func then E/yes.

SELECT SERVICE TYPES

Press Func then List/Services. Scroll to each Service Type and press E/yes to enable or disable.

HOLDING

Channel Hold
Press Channel to hold on a Channel. Scroll to channels. Press Channel to release Hold mode.

Department Hold
Press Dept to pause then hold on any Department. Double press Dept to hold without a pause. Press Dept then quickly scroll to the Department in pause mode. Double press Dept to release Department hold.

Site Hold
Press Func then Dept to hold on any Site. Press Func then Dept to release Site hold. Press Dept then rotate the scroll control to select a Site.

System Hold
Press System to pause then hold on any System. Double press System to hold without a pause. Press System then quickly scroll to the System in pause mode. Double press System to release System hold.

REPLAY THE LAST TRANSMISSIONS

While scanning, press Replay. Press Channel to pause/resume replay. Turn the Scroll Control to select recordings.

START/STOP RECORDING

While scanning, press Func then Replay. Note: Resets to Off when you turn off the scanner.

ADVANCED CHANNEL MENU

While the channel is in the display, press E/yes. Edit Current Channel - See Channel Options. Add to Favorites List - Press E/yes or /no.
At **Select Favorites List**, scroll to the Favorites List and press **E/yes**.

**Save Sub Audio/P25 NAC** - CTCSS Tone or DCS/NAC Code (blinking)

At **Are you sure?**, press **E/yes**.

**Save Talk Group ID** - Unknown Talk Group ID with ID Search

At **Are you sure?**, press **E/yes** or **.No**.

At **Select Department**, scroll to the Department and press **E/yes**.

**Save Unit ID** - Unknown Unit ID

At **Are you sure?**, press **E/yes** or **.No**.

**STORE A SEARCH FREQUENCY (SEARCH WITH SCAN)**

Press **E/yes**.

Then see Storing Frequencies.

**Adding Systems From the Database**

Press **E/yes** to store a frequency.

### ATTENUATION

**Channel Attenuation** - Press **Channel** to hold on the channel and press **Func** then 4(<ATT) to toggle attenuation.

**Global Attenuation** - Press **Channel** to hold on any channel then press **Func** then press and hold 4(<ATT) to toggle global attenuation.

### MODULATION

**Conventional Channel Modulation**

Press **Channel** to hold on the channel.

Press **Func** then **Channel(MOD)** to toggle modulation.

Press **Channel** to release hold mode.

**Site Modulation**

Press **Func** then **Dept** to hold on the Site.

Press **Channel** to hold on any channel.

Press **Func** then **Channel(MOD)** to toggle modulation.

Press **Channel** to release hold mode.

Press **Func** then **Dept** to release Site hold mode.

**INTERMEDIATE FREQUENCY EXCHANGE**

Press **Channel** to hold on the channel.

Press **Func** then **7(IFX)** to toggle on or off.

**REPEATER FREQUENCY CONVENTIONAL CHANNEL**

Press **Channel** to hold on the channel.

Press **Func** then press and hold **8(REV)**.
CHANNEL VOLUME OFFSET
Press Channel to hold on the channel.
Press Func then press 0(LVL) to toggle.

AVOIDING CHANNELS, DEPARTMENTS, SITES, AND SYSTEMS
Avoids are common to every System in the Favorites List.
Temporary Avoids cancel when you cycle power. See also Review Avoids.

Channel Avoid
When the Channel is in the display or in Channel Hold mode:
To Temporary Avoid, press Avoid once.
To Permanent Avoid, press twice when the channel is in the display or in Channel Hold mode.

Department Avoid
Press Dept then Avoid once to Temporary Avoid.
Press Avoid twice to Permanent Avoid.

Site Avoid
When the Site is in the display or in Site Hold mode (Func then Dept):
To Temporary Avoid, press Dept then quickly press Avoid.
To Permanent Avoid, press Dept then quickly press Avoid twice.
To Stop Avoiding, press Dept then Avoid once.
Press Func then Dept to release Site hold.

System Avoid
Press System then Avoid once to Temporary Avoid.
Press Avoid twice to Permanent Avoid.

SET THE RANGE
See Set Range.
See also Understanding Range and Understanding Location Control.

DIRECT FREQUENCY/TGID ENTRY
Press Channel to hold on any Channel.
Enter the Frequency/TGID and press E/yes. Press Channel to release hold.

USING NUMBER TAGS
If two Favorites Lists have the same number tag, they will be selected in sequence. The first time you select the number tag, the scanner will go to the first Favorites List assigned to that number tag; if you select the same number tag again, it will go to the 2nd Favorites List assigned to that number tag, and so on. The same rule applies to System and Channel number tags.

View Number Tags
Number Tag is always displayed in Scan Hold mode.
Go To Number Tag

Press Channel to hold on any channel.
Enter the Favorites number tag, /no, then the System number tag, /no, then the Channel number tag and press Channel.

Examples:
1.01.36 to go to Channel 36 in System 01 in Favorites List 1.
.01.36 to go to Channel 36 in System 01 in current Favorites List.
..36 to go to Channel 36 in current System.

CLOSE CALL MODES

To toggle CC Off, CC DND, or CC Pri:
Hold on any channel and press Func then Avoid( ).

Close Call Hit
See Using Close Call.
PRIORITY MODES
Press Func then ./no(PRI) to toggle Priority mode Off, DND, or On.

CUSTOM SEARCH BY SEARCH KEY
Press Channel to hold on any channel.
Press Func then 1(SRCH1), 2(SRCH2), or 3(SRCH3), to start a Custom Search assigned to a Search Key.

CLOSE CALL ONLY
Press Func then press and hold Avoid ( ).

TONE-OUT STANDBY/SEARCH
Assign Tone-Out Standby/Search to a Search Key.

REVIEW AVOIDS
Database Avoids. Press Menu and scroll to Manage Full Database.
Scroll to the following:
Review Avoids - Scroll to each channel, department, site, or system and press E/yes to Stop Avoiding. Temporary Avoids appear reversed in the display - AVOID.
Stop All Avoiding - At Confirm?, press E/yes or ./no.
Favorites List Avoids. Press Menu and scroll to Manage Favorites.
Scroll to the Favorites List and press E/yes.
Scroll to the following:
Review Avoids - Scroll to each channel, department, site, or system and press E/yes to Stop Avoiding. Temporary Avoids appear reversed in the display - AVOID.
Stop All Avoiding - At Confirm? press E/yes or ./no.
ID Avoids. Press Menu and scroll to Manage Favorites.
Scroll to the Favorites List and press E/yes.
Scroll to the System and press E/yes.
Scroll to Edit Sys Options and press E/yes.
Scroll to the following:
Review ID Avoids - Scroll to each ID and press E/yes to Stop Avoiding.
Clear All ID Avoids - At Confirm? press E/yes or ./no.
Clear All Avoids for Site or Department – Press Channel to hold on any System.
Press and hold Avoid.

QUICK SEARCH
Press Func then E/yes to start Quick Search at the current frequency.
DIGITAL ADJUSTMENT MODE

Press Scroll Control knob then Func then Scroll Control knob. Press Scroll Control knob to exit.

Press Func then Dept to hold on a Site or Channel to hold on a digital Channel.

The first line on the display now shows the digital error rate and the decode threshold setting (0-20). The second line on the display shows the decode threshold levels for the site.

Allow the scanner to monitor the site or channel for several minutes. The error rate should drop for each transmission and the threshold levels should automatically adjust to a more optimal setting. Then, once the threshold level settles to a stable setting, make a note of the value. This is the site’s or channel’s optimum decode threshold.

Press Func and rotate the Scroll Control to set the MAN decode threshold start level to a setting that most closely matches the system’s optimum decode threshold. Whatever you set at this point will be remembered for this site as the starting point for the auto-tuning function for subsequent transmission on site. See also Digital Threshold Level.

USING A GPS

LOCATION-BASED SCANNING

You can connect the scanner to a compatible GPS device and set the scanner to automatically Avoid and Unavoid Departments and Sites based on your current location. This frees you from having to manually enable and disable Departments and Sites as you change locations.

Use the 4-pin mini plug to connect to the scanner using a NMEA compatible GPS device.

A good application of this feature would be to set the longitude and latitude for each multi-site system transmitter as usually you can receive at least a handful in any given location. Set the range to around 48 kilometers and the scanner will automatically Avoid or Unavoid Sites when
in and out of range. It may also be relevant to set different locations/ranges for the Departments within the site.

You can find the physical location of antennas using the databases available at Radio Reference or the FCCs Antenna Structure Registration site.

Both sites list the latitude, longitude, and height of the antenna and both sites can map the exact location for you.

Once the scanner completes the initial GPS review, if you move into or out of an area covered by a Site/Department, the scanner will Avoid and Unavoid Sites and Departments according to Range settings for the scanner and Sites/Departments.

If you cycle power, all Sites/Departments are Unavoided until the scanner reacquires the GPS signal and completes the initial GPS review.

Note: If you unplug your GPS device or it loses reception to satellites, the scanner will use the last known location as the current location.

See also Set Location to set your Location, Range, and relevant GPS options.

See also Understanding Location Control and Understanding Range.

All Sites/Departments with locations set and not within range of your current location will be temporarily Avoided.

DISCOVERY MODE

Trunking Discovery mode allows you to monitor a trunked radio system, logging system channel activity and recording the audio for channels.

Conventional Discovery mode lets you monitor a range of frequencies, logging frequencies with activity and recording the audio for frequencies that are not already known to be in use in your area so that you can more easily identify the users. This includes frequencies used conventionally as well as in trunked radio systems.

In both modes, you also have the option to compare hits to the Database and log all hits or just new hits.

If you use the Auto Store option, Discovery will create a new Trunking System for IDs found for each Session or will create a new Conventional System for frequencies found for each Session.

You can create and save several sessions with different settings. Every time you start a session you create a Run that can later be reviewed in the scanner or the Sentinel software.

NEW SESSION

Press Menu then scroll to Discovery and press E/yes.

Scroll to Trunking Discovery or Conventional Discovery and press E/yes.

Scroll to New Session and press E/yes.

Conventional Discovery
  Input Session Name - Enter the Name and press E/yes. See Data Naming.

Trunking Discovery
  Input System Name - Enter the first few relevant letters of the system and press E/yes.
  See Data Naming.

Note: The System must be enabled for scan to input system name.
Select System - Scroll to the System and press E/yes.
Select Site - Scroll to the Site and press E/yes.
Input Session Name - Enter the Name and press E/yes. See Data Naming.

SESSION OPTIONS
Press Menu then scroll to Discovery and press E/yes.
Scroll to Trunking/Conventional Discovery and press E/yes.
Scroll to the Discovery Session and press E/yes.

- Start Discovery
- Edit Session Name
- Set Limit Frequencies
- Set Modulation
- Set Step
- Set Delay
- Set Logging
- Set Compare to database
- Set Record Duration
- Set Time-Out Timer
- System Information
- Set Auto Store
- Delete Session
- Change System

Start Discovery
This starts the Discovery Session.
Press Menu to stop and review the Run information. See Review Discovery.
Press Avoid to Avoid a hit.
Press Func then System to exit.

Edit Session Name
This allows you to name a Session.
See Data Naming.

Set Limit Frequencies (Conventional Only)
This sets the lower and upper frequencies for conventional discovery session.
Set Lower Limit Enter the lower limit.
Set Upper Limit Enter the upper limit.

Set Modulation (Conventional Only)
This sets the modulation for conventional discovery session.
Auto, AM, FM, NFM, WFM, or FMB (FM Broadcast)

Set Step (Conventional Only)
This sets the step size for conventional discovery session.
Auto, 5, 6.25, 7.5, 8.33, 10, 12.5, 15, 20, 25, 50, or 100 kHz

Set Delay
This sets the Delay when monitoring a site or frequencies.
0, 1, 2, 3, 4, or 5 sec.

Set Logging
This will log all hits or just new hits.

48
All or New Only

**Set Compare to Database**
Select On to compare hits against the channels already in the Database. Only new channels will have audio recorded (if enabled). Select Off to treat all hits as new channels.

- On or Off

**Set Record Duration**
This sets how much audio will be recorded for each new channel.

- None, 30, 60, 90, 120, 150, 180, 300, or 600 sec.

**Set Time-Out Timer**
This is used to keep a stuck channel from stealing the whole Run in a session.

- Off, 10, 30, or 60 sec.

**System Information (Trunking Only)**
This will give you where it came from, (Full Database or Favorites List), the System Type, (Motorola, P25, etc.), and the System used for the Discovery Session.

**Set Auto Store**
This turns Auto Store on and will create a System called **Conventional** or **Trunking Discovery**.

- On or Off

**Delete Session**
This deletes the session.

- At **Confirm Delete?** Press E/yes or ./no.

**Change System (Trunking Only)**
This allows you to create or change the System used and change the Site used for the session.

- **Input System Name**
  - Press E/yes to Skip if System is saved.
  - See Data Naming.

- **Select System**
  - Select the System to use for the session.

- **Select Site**
  - Select the Site to use for the session.

### REVIEW DISCOVERY

In Review Discovery mode, you can review the results of discovery mode runs, resume runs, or restart saved discovery sessions.

Press **Menu** then scroll to **Discovery** and press E/yes.

Scroll to **Review Discovery** and press E/yes.

Scroll to **Trunking/Conventional Discovery Results** and press E/yes.

Scroll to select each **Run**.

- **Review Run Results**
Summary List by each frequency.
Detail - List by each hit.

**Restart this Run.** Delete all log files.
- **Restart?** Press E/yes or ./no.

**Resume this Run** Continue without deleting log files.
- **Resume?** Press E/yes or ./no.

**Delete this Run**
- **At Confirm Delete?** press E/yes or ./no.

**Resume this Run**
- **Continue without deleting log files.**
- **Resume?** Press E/yes or ./no.

**Delete this Run**
- **At Confirm Delete?** press E/yes or ./no.

**Rename this Run**
- **See Data Naming.**

**Run Information**
- **Shows the Session settings.**

---

**SEARCH/CLOSE CALL OPTIONS**

These are the settings you should look at before you perform a Quick Search, or Close Call Search.

Press **Menu.** Scroll to **Srch/CloCall Opt** and press E/yes.

Scroll to the options below and press E/yes.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Setting</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freq Avoids</td>
<td>Set Delay Time</td>
<td>Digital Waiting Time</td>
</tr>
<tr>
<td>Broadcast Screen</td>
<td>Set Attenuator</td>
<td>Digital Threshold Mode</td>
</tr>
<tr>
<td>Repeater Find</td>
<td>Set Audio AGC</td>
<td>Digital Threshold Level</td>
</tr>
</tbody>
</table>

**Freq Avoids** – This allows you to review Avoided Frequencies or Stop Avoiding all Frequencies for Searching and Close Call search.

Temporary Avoids appear reversed in the display - **AVOL.**

- **Stop All Avoiding.** See also Search Avoids.
  - **At Confirm?** Press E/yes or ./no.

**Rvw Search Avoid**
- Scroll to Frequency and press E/yes to Stop Avoiding.

**Broadcast Screen** – Automatically ignores transmissions that are on common broadcasts, paging systems, and other annoyance radio sources during Custom Search, Quick Search, or Close Call Search. The default setting is **Pager On.**

- **Set All Band On/Off.** Turns Broadcast Screen On or Off for All Bands.
- **Set Each Band**
  - Scroll to each **Band** and press E/yes to enable or disable.

**Program Band**
- **Band 0-9** Select for each Close Call Band and other searches.
  - **Set Lower Limit** - Input the lower frequency limit.
  - **Set Upper Limit** - Input the upper frequency limit.
- **Press Menu** to return and repeat for each band as needed.
**Repeater Find** – Sets whether the scanner tries to tune to a repeater output frequency when it detects a transmission on a repeater input frequency, in Search and Close Call modes. Turning this feature on can let you hear both sides of the conversation on the output frequency. The default setting is **Off**.

**On** or **Off**

**Set Delay Time** – Determines how long the scanner waits after a transmission ends before resuming Quick Search and Close Call Search operations.

A negative delay will force a resume after that number of seconds.

The default setting is **2** seconds.

-10, -5, 0, 1, 2, 3, 4, 5, 10, or 30 sec.

**Set Attenuator** – This controls the attenuator for Quick Search, and Close Call operations by about 20dB. The default setting is **Off**.

**On** or **Off**

See also **Search Attenuation**.

**Set Audio AGC** – This allows you to turn AGC (Automatic Gain Control) on or off for Quick Search and Close Call modes. The default settings are **Off**.

**Analog**. Press E/yes to toggle **On** or **Off**.

**Digital**. Press E/yes to toggle **On** or **Off**.

**Digital Waiting Time** – This setting gives the scanner time to determine if frequencies have digital or analog transmissions. During this time, the scanner will evaluate the received signal and, if it detects digital data, will open squelch immediately. If digital is not detected before the delay expires, the scanner will open squelch at the end of this delay. This is to prevent “false decode” problems. The default setting is **400** ms.

0 to 1000 ms

*Note: Any analog transmissions will lose the first part of the transmission, up to the wait time you set here.*

**Digital Threshold Mode** – The default setting is **Auto**.

**Auto**. Automatically sets the decode threshold based on the received signal.

**Manual**. Allows you to manually set the threshold in threshold setting mode or using the Digital Threshold Level setting.

**Default**. Sets the scanner to the default threshold of **8, Auto**.

**Digital Threshold Level** – The default setting is **8**.

5 to 13
SEARCH OPTIONS

Press Menu. Scroll to Search for... and press E/yes.
Scroll to the options below and press E/yes.

- Custom Search
- Set Search Key
- Edit Custom
- Search with Scan

IMPORTANT! There are many options and setting in Search/Close Call Options that affect and compliment the settings for searching. Please review those first.

EDIT CUSTOM

You can edit the 10 Custom Search ranges. The default custom search range names appear as Custom 1, Custom 2, and so on.

- Custom 0-9. Select for each Custom Search.
  - Edit Name. See Data Naming.
  - Edit Srch Limit
    - Set Lower Limit. Enter the lower limit.
    - Set Upper Limit. Enter the upper limit.
  - Set Delay Time
    - -10, -5, 0, 1, 2, 3, 4, 5, 10, or 30 sec.
  - Set Modulation
    - Auto, AM, NFM, FM, WFM, or FMB (Broadcast)
  - Set Attenuator
    - On or Off
  - Set Step
    - Auto, 5, 6.25, 7.5, 8.33, 10, 12.5, 15, 20, 25, 50, or 100 kHz
  - Set Audio AGC
    - Analog - Press E/yes to toggle On or Off.
    - Digital - Press E/yes to toggle On or Off.
  - Digital Waiting Time
    - 0 to 1000 ms
  - Digital Threshold Mode
    - Auto, Manual, Default
  - Digital Threshold Level
    - 5 to 13
  - Search with Scan. See also Select Lists to Monitor and Search with Scan.
  - Set Avoid
    - Stop Avoiding, Temporary Avoid, or Permanent Avoid
  - Set Hold Time. Sets how long to search when scanning.
    - Enter the hold time (0-255 sec.) and press E/yes to save.
SET SEARCH KEY
The scanner has three search keys that you can assign to a search range. The search keys are number keys 1, 2, and 3. This allows you to start a Custom, Tone-Out, or Close Call Search without having to go into the menus.

Search Key 1-3. Select a search for each Search Key.
. (nothing assigned), Custom Search 0-9, Tone-Out, or Close Call.

SEARCH WITH SCAN
This enables Custom Searches in Scan mode.
See also Select Lists to Monitor and Edit Custom Search.

Set System Avoid
Stop Avoiding, Temporary, or Permanant Avoid.

QUICK SEARCH
Allows you to start searching at the displayed frequency, or enter a frequency and start searching from that frequency in hold modes.

Quick Search will search all the way up to 1300 MHz or all the way down to 25 MHz then start over.

To Start a Quick Search from the Displayed Frequency:
Press Channel to hold on the channel or frequency.
Press Channel again to release hold mode and start searching.

To Start a Quick Search from a New Frequency:
Press Channel to hold on any channel or frequency.
Enter the new frequency then press Channel to set the new starting frequency. Press Channel again to release hold mode and start searching.
Press Channel to hold on any channel or frequency. Enter the new frequency you wish to start at then press Channel to set the new starting frequency. Press Channel again to release hold mode and start searching.

CUSTOM SEARCH

Allows you to search the scanners 10 programmed frequency ranges.
See also Edit Custom Search.
Press **Menu**. Scroll to **Search for...** and press **E/yes**.
Scroll to **Custom Search** and press **E/yes**.
See also Set Search Key.

**Change Direction or Resume Search**

Turn the Scroll Control.

**Select Custom Search Bands**

Press the number keys to enable or disable each Custom Search band.

**Holding**

**Frequency Hold.** Press **Channel** to hold on a Frequency.
Scroll to frequencies. Press **Channel** to release hold.

**Avoiding Frequencies**

Temporary Avoids cancel when you cycle power.

- **Frequency Avoid** - Press **Avoid** once to **Temporary Avoid**.
- Press quickly to toggle **Permanent Avoid** and **Stop Avoiding** when the the scanner stays in a frequency or in Search Hold mode.
- **Review Avoids** - Press **Channel** to hold on any Frequency.
- Press **Func** then **Avoid**. Scroll to each frequency and press **E/yes** to **Stop Avoiding**.
- **Stop All Avoiding** - Press **Channel** to hold on any Frequency.
- Press and hold **Avoid**. The scanner displays Search Frequencies All Unavoided.
See also Freq Avoids.

**Attenuation**

- **Band Attenuation.** Press **Func** then **4(<ATT)** for each band.
- **Global Attenuation.** Press **Channel** to hold on any frequency then press and hold **Func** then **4(<ATT)** to toggle global attenuation.

**Modulation**

Press **Func** then **Channel(MOD)** for each band.

**Direct Frequency Entry**

Press **Channel** to hold on any frequency. Enter the frequency and press **Channel**. Press **Channel** to release hold.

**Frequency Intermediate Exchange**

Press **Channel** to hold on any frequency. Press **Func** then **7(IFX)** to toggle on or off.

**Repeater Frequency**

- Press **Channel** to hold on any frequency.
- Press **Func** then press and hold **8(REV)**.

**Replay the Last Transmissions**

While searching, press **Replay**.
Press **Channel** to pause/resume replay.
Turn the **Scroll Control** to select recordings.
Start/Stop Recording
While searching, press Func then Replay.

Note: Resets to Off when you turn off the scanner.

Storing Frequencies
Displayed Frequency into a Quick Save Department – Press E/yes.
You will see Quick Frequency Save in the display then press E/yes.
The scanner stores the frequency into the Quick Save Department in the Quick Save System.

Displayed Frequency into an Existing Department – Press E/yes.
You will see Saving to Quick Dept in the display then press ./no.
At Saving Channel to scroll to the Favorites List and press E/yes.
At Select System scroll to the System and press E/yes.
At Select Department scroll to the and press E/yes.
After storing the frequency, you will be at the Edit Channel menu to complete the settings for the new channel.
If you don’t want to edit the channel settings or are done editing the channel, press Avoid to return to searching.

Search Menu
Press Func then Menu.

Close Call Modes
To toggle CC Off, CC Pri, or CC DND:
Press Func then Avoid ( ).

CLOSE CALL
Your scanner’s Close Call feature lets you set the scanner so it detects, alerts you to, and displays the frequency of a nearby strong radio transmission. You can set the scanner so the Close Call feature checks for a Close Call hit every 2 seconds in the background while you are scanning, searching, listening to the weather frequency, etc. or use Close Call Only mode. Close Call ‘Do-Not-Disturb’ will only check for close call signals when you are not receiving transmissions. You can also select the frequency band(s) to look for transmissions. When the scanner detects a Close Call hit, it alerts you according to the alert settings.
‘Hits with Scan’ is a special system that automatically stores the last 10 Close Call hits until you cycle power.
The Close Call feature works well for locating the source of strong local transmissions such as mobile and handheld two-way radios in areas with no other strong transmission sources. Performance is increased with higher transmit power, a receive antenna tuned to the target band, and a low background RF level.
The Close Call feature works better with some types of transmissions than others.
It might not correctly display frequency information for transmitters using a highly directional antenna (such as an amateur radio beam antenna) or if there are many transmitters operating at the same time in the same area.
CLOSE CALL OPTIONS

Important! There are many options and settings in Search/Close Call Options that affect and complement the settings for Close Call. Please review those first.

*Note: Close Call does not operate in Weather Scan or Tone-Out Standby/Search.*

Scroll to the options below and press E/yes.

- Close Call Only
- Hits with Scan
- Set CC Bands
- Set CC Alert
- Set CC Mode

**Close Call Only**

This setting puts the scanner in Close Call Only mode.

See also Using Close Call.

You can also toggle these modes by:

- Holding on any channel and pressing Func then Avoid (🚫).

**Hits with Scan**

This is a special system that automatically stores the last 10 close call hits and allows you to scan them. Accessible only in the Close Call menu, the system has to be Unavoided to view while scanning (default is Permanent Avoid). The scanner will delete the frequencies in this system when you turn the power off.

- Set Avoid
  - Stop Avoiding, Temporary, or Permanent Avoid

- Set Hold Time. Sets how long to search when scanning.

  Enter the hold time (0-255 sec.) and press E/yes to save.

**Set CC Mode**

Selects the Close Call mode when scanning or searching.

- Off. Close Call is turned off.
- CC DND. Close Call checks for frequencies every two seconds when the scanner is not receiving a transmission.
- CC Priority. Close Call checks for frequencies every two seconds.

You can also toggle these modes by:

- Holding on any channel and pressing Func then Avoid (🚫).

**Set CC Bands**

Lets you select the Close Call bands to be searched.

- Scroll to each Band and press E/yes to toggle On or Off.

Press Menu to return.

- VHF Low 1 - 25-54 MHz
- VHF High 2 - 225-320 MHz
- VHF Low 2 - 54-108 MHz
- UHF - 320-512 MHz
**Set CC Alert**

This allows you to set an Alert Tone, Alert Light, and sets the Pause time for Close Call when you receive a hit.

- **Set Alert Tone**
  Alert 1-9 or Off.

- **Set Level**
  Level 1-15 or Auto (the master volume level).

- **Set Alert Light**
  - **Set Color**
    Off, Blue, Red, Magenta, Green, Cyan, Yellow, or White.
  - **Set Pattern**
    On, Slow Blink, or Fast Blink.

- **Set CC Pause**
  3, 5, 10, 15, 30, 45, 60, sec. or Infinite.

**Close Call Only Mode**

Press **Channel** to hold on any channel/frequency.

Press **Func** then press and hold **Avoid** (⋯). See also Set Search Key.

You will see activity on the 7 bands in the display. Bands with an * (asterisk) under them are turned off.

When the scanner detects a Close Call signal, **CC Found!** and **Press Any Key** display for the length of time set in Close Call Pause.

**Toggle Close Call Bands**

Press the number keys to enable or disable each Close Call band.

**Cancel a Hit**

Turn the **Scroll Control**.

**Holding on a Hit**

Press **System**, **Department**, or **Channel** to hold on the Close Call Hit.
Press Channel to cancel hold. Turn the Scroll Control to start Quick Search.

**View Last Hit**
Press System, Department, or Channel to recall the last hit.
Press Channel to cancel hold.

**Avoiding Hits**
Temporary Avoids cancel when you cycle power.
Press Avoid once to Temporary Avoid.
Press quickly to toggle Permanent Avoid and Stop Avoiding when the frequency is in the display or in Search Hold mode.

**Review Avoids.** Press Channel to hold on any Frequency.
Press Func then Avoid. Scroll to each frequency and press E/yes to Stop Avoiding.
Temporary Avoids appear reversed in the display - T.

**Clear All Avoids** - Press Channel to hold on any Frequency.
Press and hold Avoid. The scanner displays Search Frequencies All Unavoided.

---

**Attenuation**
Press Func then 4(<ATT) for all bands.

**Modulation**
Press Func then Channel(MOD) for all bands.

**Intermediate Frequency Exchange**
Press Channel to hold on any frequency.
Press Func then 7(IFX) to toggle on or off.

**Repeater Frequency**
Press Channel to hold on any frequency.
Press Func then press and hold 8(REV).

**Replay the Last Transmissions**
Press Replay.
Press **Channel** to pause/resume replay.  
Turn the **Scroll Control** to select recordings.

**Start/Stop Recording**

Press **Func** then **Replay**.

*Note: Resets to Off when you turn off the scanner.*

**Storing**

**Displayed Frequency into a Quick Save Department.** Press **E/yes**.
You will see **Saving to Quick Save Department** in the display then press **E/yes**.
The scanner stores the frequency into the **Quick Save Department**.

**Displayed Frequency into an Existing Department** Press **E/yes**.
You will see **Saving to Quick Save Department** in the display, then press **/no**.
At **Select Department**, scroll to the department where you want to store the frequency and press **E/yes**.

After storing the frequency, you will be at the Edit Channel menu to complete the settings for the new channel.

If you don’t want to edit the channel settings or are done editing the channel, press **Avoid** to return to searching.

**Close Call Menu**

Press **Func** then **Menu**.
FIRE TONE-OUT

Fire Tone-Out will monitor up to 32 different channels for paging tones (two-tone sequential, single tone, and group tone).

**Tone-Out Standby Mode** is used if you use programmed tones.

**Tone-Out Search Mode** is used if you don’t know the tones.

All tone-outs (channels) that have the same frequency (and modulation and attenuation) as the one you select will also (and only) be monitored so you can monitor up to 32 tone-out channels for one frequency.

In this case, the scanner displays each tone-out channel for two seconds. It does not scan them; tone-out monitors the frequency for all tone-out channels with the same frequency.

Regardless of the current display, the scanner will alert on any received tone out that matches a stored setting (channel) for the frequency.

*Note: Tone-Out Search Mode will not display each Tone-Out channel for two seconds, even when multiple channels have the same frequency, modulation and attenuator settings with other channels.*

**TONE-OUT SETUP**

Press **Menu**. Scroll to **Tone-Out for...** and press **E/yes**.

Scroll to **Tone-Out Setup** and press **E/yes**.

Scroll to **Tone-Out (0-31)** and press **E/yes**.

*Note: Close Call DND/Pri and Weather Alert Priority do not operate in this mode.*

<table>
<thead>
<tr>
<th>Edit Name</th>
<th>Start Delay Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Set Frequency</td>
<td>Set Alert</td>
</tr>
<tr>
<td>Set Tone</td>
<td>Set Audio AGC</td>
</tr>
</tbody>
</table>

**Edit Name**

See Data Naming.

**Set Frequency**

**Edit Frequency** Enter the frequency and press **E/yes**.

**Set Modulation**

Auto, NFM, FM

**Set Attenuator**

On or Off

**Set Tone**

**Edit Tone A** and press **E/yes**. Enter the tone and press **E/yes** to save.

**Edit Tone B** and press **E/yes**. Enter the tone and press **E/yes** to save.

Press **Menu** to return.

*For two-tone pages*, enter the tones (in Hz) for tone A and tone B.

*For one-tone pages* using short tones between 1.25 and 3.75 seconds, enter tone for tone A, and 0 for tone B.
For **long-tone pages**, such as group pages of more than 3.75 seconds, enter 0 for tone A, and the **tone** for B.

**To search for tones**, leave the tones for A and B at 0.

**Set Delay Time**

0 - the scanner resumes standby as soon as the carrier drops after a page.

1, 2, 3, 4, 5, 10, 30 - (seconds): the scanner resumes standby mode after the carrier drops and the selected time expires.

**Infinite** - you must press **Hold** after a page to resume standby mode.

**Set Alert**

- **Set Alert Tone**
  - Alert 1-9 or Off.
- **Set Level**
  - Level 1-15 or Auto (the master volume level).

**Set Alert Light**

- **Set Color**
  - Off, Blue, Red, Magenta, Green, Cyan, Yellow, or White.
- **Set Pattern**
  - On, Slow Blink, or Fast Blink.

**Set Audio AGC**

This allows you to turn AGC (Automatic Gain Control) on or off for Tone-Out operations. The default setting is **Off**.

**Analog** - Press E/yes to toggle On or Off.

**FIRE TONE-OUT STANDBY/SEARCH**

Press **Menu**. Scroll to **Tone-Out for...** and press E/yes.

Scroll to **Tone-Out Standby** and press E/yes.

See also Set Search Key.

Scroll to monitor a Tone-Out channel (0-31).

Press **Func** then **System** to exit.
Any transmission received on the frequency will not be heard but you will still see the signal strength bars.

To monitor a different frequency, scroll to a tone-out (channel) with a different frequency.

If you press **Channel** while in Standby/Search mode, the scanner temporarily exits and you will be able to hear any transmissions on that frequency. No alerts sound, even if a tone-out matches one you have programmed in hold mode. Press **Channel** again to return to Standby/Search mode.

If the scanner finds tones in Tone-Out Search mode, you will see **Set Found Tone A and B?** after you press **E/yes** to save.

---

**Select a Different Tone-Out**

Turn the **Scroll Control**.

**Listen to Tone-Out Frequency**

Press **Channel**.

**Attenuation**

Press **Func** then **4(<ATT)**.

**Modulation**

Press **Func** then **Channel(MOD)**.

**Intermediate Frequency Exchange**

Press **Func** then **7(IFX)** to toggle on or off.

**Start/Stop Recording**

Press **Func** then **Replay**.

*Note: Resets to Off when you turn off the scanner.*

**Store Found Tones**

Press **E/yes** at **Save Found Tones?**.

**Tone-Out Menu**

Press **Func** then **Menu**.
APPENDIX

TROUBLESHOOTING

Scan Mode, Nothing to Scan
1. Make sure the Favourites Lists are enabled in Set Scan Selection
2. Make sure Service Types are enabled for the Channels you want to hear.
3. Make sure you have locations programmed if Use Location Control is On.
4. Make sure longitude and latitude are N and W.
5. Make sure Systems/Departments/Channels are not Avoided.
6. Make sure Favorites List/System/Department quick key is enabled.
7. (Search with Scan) Make sure Search with Scan is enabled in Select Lists to Monitor and the Search for Menu and for the Custom Search.

Scanning Interrupted
1. Turn off Priority Scan. Change Priority Interval.
2. Turn off Close Call Priority.
3. Set Channel Delay longer.
4. Set positive Channel Delay.

All Channels Out of Range
1. Increase your range.
2. Turn Location Control off for the Favorites List.

DEFAULT BAND COVERAGE

**REMOVING THE microSD CARD**

Turn your scanner off. Carefully remove the microSD card by using a thumbnail or pencil eraser to push the card in so it will spring out. Handle with care if you are going to use it in a card reader. Gently install the microSD card the same way it was removed and to push the card in so it will spring back into place.

**Reformatting the microSD Card**

Reformat microSD cards using a special SD Card Formatter (https://www.sdcard.org/downloads/formatter_4/). Then, you need to “Clear User Data” using Sentinel to restore all HP files and directories to the card.

After formatting, the HP won’t be automatically detected (since it is wiped clean), so you may need to uncheck “Hide empty drives” in windows “Tools>Folder Options>View” before doing the “Clear User Data” step.

**ENTERING IDS**

These are the acceptable ID entry formats.

Partial IDs can be used to receive all IDs in a Fleet, Sub-Fleet, Agency, etc.
Partial IDs can also be Avoided.

**Note:** *A-RR (Partial Repeater ID) cannot be used with decimal formats.*

**TYPE II SPECIAL STATUS BITS**

Type II Motorola Smartnet systems use these status bits for special transmissions such as emergency, patches, DES/DVP scrambled transmissions, and multiselects. Motorola trunking radios directly interpret them for their special functions, thus no difference is noticed by the person with the radio. The scanner however interprets these special talk group status bits as different talk groups entirely. Below is the conversion chart for these special status bits.

<table>
<thead>
<tr>
<th>TT ID + # Usage</th>
<th>TT ID + # Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>ID+0 Normal Talk group</td>
<td>ID+8 DES/DVP Encryption Talk group</td>
</tr>
<tr>
<td>ID+1 All Talk group</td>
<td>ID+9 DES All Talk group</td>
</tr>
<tr>
<td>ID+2 Emergency</td>
<td>ID+10 DES Emergency</td>
</tr>
<tr>
<td>ID+3 Talk group patch to another</td>
<td>ID+11 DES Talk group patch</td>
</tr>
<tr>
<td>ID+4 Emergency Patch</td>
<td>ID+12 DES Emergency Patch</td>
</tr>
<tr>
<td>ID+5 Emergency multi-group</td>
<td>ID+13 DES Emergency multi-group</td>
</tr>
</tbody>
</table>
TT ID + # Usage

<table>
<thead>
<tr>
<th>ID+6 unassigned</th>
<th>ID+14 unassigned</th>
</tr>
</thead>
<tbody>
<tr>
<td>ID+7 Multi-select (initiated by dispatcher)</td>
<td>ID+15 Multi-select DES TG</td>
</tr>
</tbody>
</table>

Therefore, if a user was transmitting a multi-select call on talk group 1808, the scanner would actually receive those transmissions on 1815.

Some common uses of these status bits are as follows:

When a user hits their emergency button, all conversations on the talk group revert to the emergency status talk group (ID+2) until the dispatch clears the emergency status. Therefore, if someone hit their emergency button and their radio was on talk group 16, all communications would switch to talk group 18.

A lot of Fire and EMS departments dispatch tone-outs and alarms as Multi-select communications (ID+7). Therefore, if your fire department dispatch talk group is 1616, and they do dispatch tone-outs and alarms as Multi-selects, then those communications will be on talk group 1623.

Continuous Tone Coded Squelch System (CTCSS) and Digital Coded Squelch (DCS) are two methods used to prevent interference by other radio communications. Your scanner can receive transmissions that use these codes.

CTCSS and DCS systems all use some form of coded squelch. Coded squelch involves the transmission of a special code signal along with the audio of a radio transmission. A receiver with coded squelch only activates when the received signal has the correct code. This lets many users share a single frequency, and decreases interference caused by distant transmitters on the same channel. In all major metropolitan areas of the United States, every available radio channel is assigned to more than one user.

**CTCSS FREQUENCIES**

The scanner can detect the following 50 CTCSS frequencies.

<table>
<thead>
<tr>
<th>67.0Hz</th>
<th>94.8Hz</th>
<th>131.8Hz</th>
<th>171.3Hz</th>

TECHNICAL SPECIFICATIONS

Band Coverage : 31 Bands
Size: 71.1 mm (W) x 36.9 mm (D) x 160.9 mm (H) (without antenna)
Weight: 348.7 g (with antenna and battery)
Operating Temperature: (-10º C) to (+ 60º C)
Storage Temperature: (-30º C) to (+ 70º C)
Power Requirements: 3 X AA Rechargeable Ni-MH Batteries (2300mAh) (included)
3 X AA Alkaline Batteries (not included)
DC 5.0V ±5%. Connect to PC with USB cable (included)

LCD Display: 192 X 160 Full Dot Matrix LCD with white-color backlight.
Internal Speaker: 24ohm, 0.8W Max.
Scan Rate: 85 channels/second
Search Rate: 80 steps/second (12.5kHz step)
250 steps/second (5kHz step)
Scan Delay: 2 seconds
Audio Output Power: Internal Speaker - 360mW nominal (24ohm)
Headphone (L-ch) 4mW nominal (32 ohm)
Antenna: 50 ohms (Impedance)

Sensitivity (12dB SINAD) Nominal
